

"A Ray of Light" - An Educational, Futuristic Center to Serve The Planet

Place: Jerusalem, Beit Hakerem

Purpose: The center is intended for developed and enlightened souls who arrive here to help the planet and they are named; the Indigo Children, Crystal children, Star Children... The center will serve children, youth and adults from every race, religion and gender. It is intended for souls who are prepared to devote themselves to service and are ready to learn how to help themselves and the planet to transfer to the fifth dimension – the dimension of love and unity.

The goal is to develop a new human being who is not controlled by his personality, but is connected to his awareness, to the superior within himself.

The subjects which will be studied:

1. Cooperation between beings and themselves
2. Cooperation between human beings and the universe; the vegetation, the animals and matter
3. Understanding the rules of the universe
4. From a very early age the students will learn to understand
 - a. who they are
 - b. why they are here on the planet (why they came to this planet)
 - c. what is their ultimate purpose
5. The opportunity will be given to each one to develop their special skills, interests and creativity
6. Spiritual studies will be offered in addition to yoga, astrology, astronomy and more. Specialists in the specific field will be invited to teach
7. Special attention will be given to develop the basic skills of compassion, acceptance, serenity, patience, self worth, generosity, listening, responsibility, humility, respect for others, happiness, clarity and love.

8. Basic subjects (reading, writing, arithmetic) will be studied in the English language through experiential learning and games, and will be suited to the needs and abilities of each learner

9. The students will learn about the needs and the contributions of Mother Earth, how to grow their food and use it to feed the students and teachers of the boarding school.

10. The instructors who will serve as mentors and "big" brothers and sisters, are highly developed spiritually and willing to serve with enthusiasm, commitment, and diligence, and to learn about their inner self continuously.

In addition, the center, which will be a model, will be international and will inhabit people from all religions and cultures. It will not be identified with any method, religion, sect or culture. The center will evolve from itself. There is no method, ideology, or doctrine which it has to execute. It will create a whole new culture from within itself – a culture of a highly developed human being.

The number of people who will be in the center is about 50 and 15 counselors. With time the number may grow. All the instructors and workers will be given special training and guidance.

Activity Rooms - Each subject will have a special room equipped for the specific needs and conditions of the area: music, art, crafts, architecture, dance, photography, movie making, scientific research, computers, yoga, meditation, astrology... In addition, there will be a library, an auditorium, a dining room and play rooms.

Anyone interested to be part of this initiative, whether as a donor or an instructor, please call Rachel Meron:
